PDF Reports, Previews, Easy Editing

New PDF Report Style

OptiMiser recently added a new Direct-to-PDF report style. This complements the existing Narrative and Graphic Word reports. PDF report generation provides faster, more compact, and more functional reports. And they look great!

Apply for Advanced Release

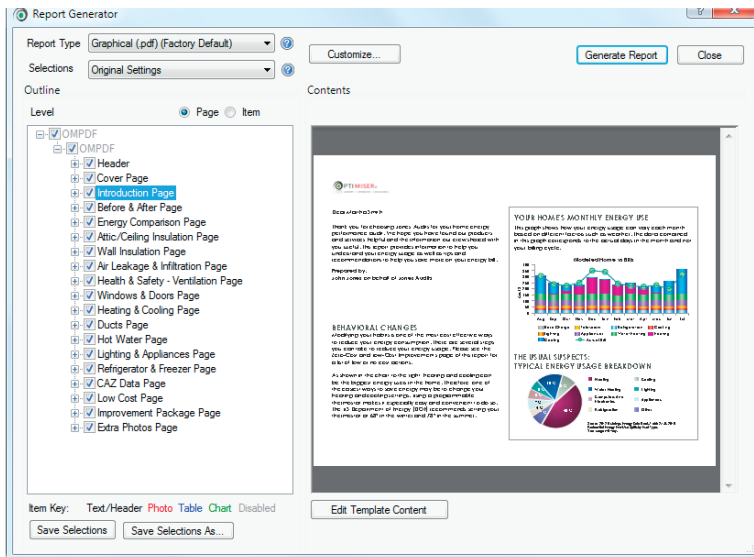

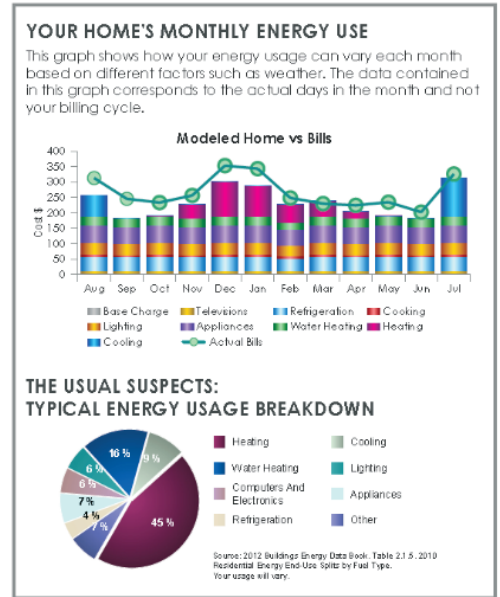

Try out new report features before the official release! Sign up to receive an Advanced Release version of OptiMiser featuring a dramatically improved report generator. If you're a power user of OptiMiser, you can be among the first to have immediate page previews, easy editing and streamlined report generation. [Click here to apply.](#)

Take a guided tour of OptiMiser. Check our [event listing](#) for the next session.

Improved Report Generator

OptiMiser has a new and radically improved report generator. The new generator offers instant page previews and direct access to report templates to make editing reports easier. Select which pages you want to appear in the report, edit photos, and change text. With the PDF report style, you can click on any page in the report generator to see an instant preview of the final result.

The new report generator will be available to all users soon. If you are interested in obtaining an Advanced Release version, please [sign up here](#).

Build Your Own Custom Report Template

You can now build new reports based on any of our factory report styles. Create and edit cloned reports via the Reports/Edit Library menu choice. With custom report templates, you can rearrange pages, edit text using static or dynamic content, change default images, and for Narrative-style reports, add completely new pages.
